

SURAJ BHALERAO

QA Automation Engineer

@ bhaleraosurajsa@gmail.com +91 9730922327 Pune in LinkedIn GitHub LeetCode Dob : 27th August 1999

PROFILE SUMMARY

QA Automation Engineer with 2 years of experience in designing and implementing scalable Selenium automation frameworks using Java. Proven track record of automating 800+ test cases, reducing manual testing effort by up to 40%, and improving defect detection through robust automation and API validation. Experienced in CI/CD integration, real-time data validation, and building maintainable, production-grade test frameworks.

EXPERIENCE

Automation Test Engineer

Accolade Electronics Pvt Ltd

Aug 2024 – Present

- Designed and implemented a scalable data-driven TestNG framework to validate real-time ATCU device data via APIs, improving test coverage and reducing maintenance effort.
- Automated 800+ end-to-end UI regression test cases using Selenium WebDriver, reducing the manual testing effort by approximately 50%.
- Performed backend API validation using Postman, identifying integration issues early and improving system reliability.
- Built a scheduled workflow based on GitHub Actions to automate task execution, generate status reports, and notify stakeholders after successful runs, reducing manual monitoring effort and ensuring timely communication.

PROJECTS

ATCU/Sampark Server Web Automation

Sept 2024 – Present

Tech Stack: Java, Selenium WebDriver, TestNG, Maven, GitHub Actions, Log4j

- Built a hybrid automation framework using Page Object Model and Factory design patterns for scalability and reusability.
- Automated 100+ test scenarios with support for cross-browser execution and environment-based configurations.
- Implemented TestNG listeners for retry logic, failure screenshots, and centralized logging.
- Integrated CI/CD pipelines using GitHub Actions for scheduled and trigger-based execution.
- Improved defect detection rate by ~30% by consistent regression execution.

LCT Server Web Automation

Oct 2024 – Feb 2025

Tech Stack: Python, Playwright

- Built a hybrid automation framework using Python and Playwright for both API and UI testing.
- Automated cross-browser test execution to ensure compatibility across multiple environments.
- Integrated GitHub Actions to schedule automated test runs, generate reports, and notify stakeholders after successful executions.
- Reduced manual testing effort by approximately 45% through end-to-end automation.

TECHNICAL SKILLS

- Languages:** Java, Python
- Automation:** Selenium WebDriver, TestNG, Hybrid Framework, Page Object Model
- API Testing:** Postman, RestAssured
- CI/CD:** Maven, GitHub Actions
- Tools:** Git, GitHub, Jira, Log4j
- Core Concepts:** OOP, Collections, Exception Handling

CERTIFICATIONS

- Oracle Gen-AI Professional – Oracle
- Java Full Stack Developer – Anudip Foundation

EDUCATION

Bachelor of Engineering

Jaihind College of Engineering

July 2023 GPA: 8.5
